

2.8 Shasta Lake

One of two meteorology towers were deployed in the northern end of the San Joaquin Valley on a small lot owned by the Shasta Lake Fire District at 13791 Lake Boulevard, Shasta Lake, CA 96019 (Figure 17). This site is about 10 km north of Redding. Unfortunately, the exposure for this site was not quite as good as the others (Figure 18). The tower was located with a few meters of a major road. A number of trees to the north and east were fairly close to the tower.
